Disease Free Certification Statements for Barbados

Shell Egg Grading Certificate No. SEA -_____ Dated: _____

1. The eggs were processed and identified in accordance with 7 CFR Part 56 to meet U.S. grade standards.

2. During the usual routine inspection of the flock(s) of origin there was no visible evidence of communicable diseases on _____ (Date(s)).

3. The U. S. Department of Agriculture, Animal and Plant Health Inspection Service, Veterinary Services certifies that:

   1. No cases of highly pathogenic avian influenza (fowl plague) and no cases of exotic Newcastle disease have been reported in commercial laying chicken flocks in the state of origin and the state where the eggs were graded and packaged for the six (6) months preceding departure of this consignment. The eggs were produced in (_____ (Name of State(s)).

   2. The shell eggs covered by this certificate were produced by birds originating from Salmonella enteritidis (SE)-certified breeding flocks which have not been identified within 90 days before shipment by the U.S. Department of Agriculture, Animal and Plant Health Inspection Service, as being infected with SE, including SE phage type 4.

   3. The shell eggs covered by this certificate were produced by birds originating from National Poultry Improvement Plan breeding flocks certified as free of Salmonella pullorum, S. gallinarum, Mycoplasma synoviae, and M. gallisepticum.
