Direct Hay Weighted Average Report for week ending 4/16/2021

Volume		
This Week	Last Reported ( )	Last Year

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Field work continued to be limited following last week's rains. A little more fertilizer got spread in the southwest but many other areas remained pretty soggy. Hay fields and pastures are growing well although some below average temperatures are keeping them from really taking off. This could however potentially result in a better quality first cutting as the grass won't out grow its ability to draw up nutrients. The supply of hay is moderate, demand is light to moderate and prices are steady. The Missouri Department of Agriculture has a hay directory visit <http://mda.mo.gov/abd/haydirectory/> for listings of hay <http://agebb.missouri.edu/haylst/>
