## Grain and Feedstuffs Market Trend

Compared to two week's ago: Trade activity and demand good for feed grade organic corn and soybeans. Organic feed grade corn traded 4 cents lower FOB than the prior period with the bulk of activity on forward contracting. Organic feed grade soybeans traded 1.09 higher FOB. Cash bids were higher this period due to the lack of imports on organic soybeans and soybean meal from India. Trade inactive on all other organic grains. The next available report will be Wednesday, March 24, 2021.

## Current Midwest Drought Summary (March 2, 2021)

Temperatures were mainly above normal through the region with the greatest departures over northern Wisconsin and the Ohio River Valley, where temperatures were 6-8 degrees above normal. With the above-normal temperatures and widespread rain from southern Illinois to southern Ohio, much of the remaining snowpack was diminished and the area quickly transitioned into spring-like conditions. It was dry over much of northern Missouri, Iowa, northern Minnesota and southern Wisconsin and from northern Illinois into Michigan. Some of these same areas are still holding on to drought and dryness from last fall and will continue to be monitored as we go into spring. Moderate drought was expanded over northern Minnesota this week. Areas of abnormally dry and moderate drought conditions were improved from central Illinois east into Indiana and Ohio.
