

Market Summary and Utilization Report, January 2021

United States Department of Agriculture

Agricultural Marketing Service

Dairy Program

Market Information Branch

MSUR-0121

February 26, 2021

Highlights. During January, 10.8 billion pounds of milk were received from Federally pooled producers. This volume of milk is 20.1 percent lower than the January 2020 volume. Regulated handlers pooled 3.7 billion pounds of producer milk as Class I products, down 5.1 percent when compared to the previous year. The all-market average Class utilization percentages were: Class I = 34%, Class II = 16%, Class III = 14%, and Class IV = 37%. The weighted average statistical uniform price was \$15.27 per cwt, \$1.43 lower than last month and \$2.91 lower than last year.

Market Summary and Utilization Report, January 2021

Federal Milk Order Marketing Area ¹	Order Number	Receipts of Producer Milk		Utilization of Producer Milk in Class I	
		Total	Change from Prev. Year	Total	Change from Prev. Year

All Markets Combined								15.27

¹ Each name in parentheses is the major city in the principal pricing point of the market.

Methodology: Market Summary and Utilization Report

Data: The monthly Marketing and Utilization Summary Report is created by aggregating monthly information on the handling of milk obtained from Federal Milk Marketing Order personnel.

Federal Milk Marketing Order Areas are defined in the Code of Federal Regulations (7 CFR Section 1XXX.2, where xxx represents the individual order number). Regulated handlers are required to submit to the Market Administrator the pounds of producer milk received in the previous month.

Definitions:

Receipts of Producer Milk is the amount of Grade A milk produced by farmers and received at pool plants by qualified handlers (7 CFR Section 1000.9). This milk is included in the market wide pool for price computation. Each order has its own criteria for producers (7 CFR Section 1XXX.12) and producer milk (7 CFR Section 1XXX.13).

Utilization of Producer Milk in Class I is the amount of producer milk pooled and disposed of as Class I fluid milk products; packaged fluid milk products in inventory at the end of the month; and Class I shrinkage.

Utilization of Producer Milk in All Classes is the percentage of the amount of producer milk pooled and disposed of in each of the four classes of milk (Class I, Class II, Class III, and Class IV). The classes of milk are defined in the Code of Federal Regulations (Section 1000.40). These percentages may not add to 100 percent due to rounding.

Uniform Price, also known as the Statistical Uniform Price or Blend Price, represents the price per hundredweight (cwt) for milk at 3.5 percent butterfat, 3.1 percent protein, and 5.9 percent other solids. In orders with component pricing, it is calculated by combining the Class III price and the producer price differential (PPD) per cwt (7 CFR Section 1XXX.61). The monthly PPD is the remaining market value of producer milk after subtracting the value of components and making adjustments for the location of the plant of first receipt and adjustments to the producer settlement fund. In orders with skim and butterfat pricing, the uniform price represents the price per cwt for milk at 3.5 percent butterfat and 96.5 percent skim after accounting for the value of milk utilized in each class of milk, adjustments for the location of the plant of first receipt, and adjustments to the producer settlement fund.

Information Contacts

Listed below are the specialists in the Agricultural Marketing Service, Dairy Program, Market Information Branch to contact for additional information. E-mail inquiries may be sent to dpp@ams.usda.gov.
