Methodology: Class I Milk Price Report

Data Source: Class I Milk Price reports are created using information on the handling of milk obtained from Federal Milk Marketing Order personnel.

The Class I Milk Price is the monthly milk price announced each month for all milk used to produce Class I Fluid Milk products. The Class I Milk Price for each Federal Milk Marketing Order is determined by adding the Class I differential for the particular county location of the regulated handler to the monthly Class I Mover (the nationwide Class I price before any Class I differentials are added). The Class I Milk price listed in the table are at the order's base location. The Class I Milk Price represents the minimum milk price required to be paid by regulated handlers to producers pooled under the Federal Milk Marketing Order program for milk used to produce Class I Fluid Milk products. The Class I Price is specific to a Federal Milk Marketing Order's principal base pricing point or the physical location of the Class I pool plant.

The monthly weighted average Class I Milk Price is derived by multiplying the individual minimum Class I Price by the amounts of milk used to produce Class I Milk products in each Federal Milk Marketing Order each month in order to obtain the value of each order's monthly Class I Milk. The aggregated combined monthly Class I Milk value is then divided by the total amount of Class I Milk pooled for the month in order to obtain the monthly weighted average Class I Milk Price for all combined Federal Milk Marketing Orders.

The year-to-date and annual weighted average Class I Milk Price for each and all Federal Milk Marketing Order(s) is derived by multiplying the individual monthly minimum Class I Prices by the amounts of milk used to produce Class I Milk products in each Federal Milk Marketing Order for the year in order to obtain the value of each Order's Class I Milk. The aggregated combined Class I Milk value is then divided by the total amount of Class I Milk pooled for the year in order to obtain the year-to-date and annual weighted average Class I Milk Price.

The Class I Butterfat Price is the monthly price announced each month for butterfat used to produce Class I Fluid Milk products. The Class I Butterfat Price for each Federal Milk Marketing Order is determined by adding the Class I Butterfat differential for the particular county location of the regulated handler to the monthly announced Class I Butterfat price. The Class I Butterfat prices listed in the table are at the Federal Milk Marketing Order's base location. The Class I Butterfat Price represents the minimum milk price required to be paid by regulated handlers to producers pooled under the Federal Milk Marketing Order program for butterfat used to produce Class I Fluid Milk products.

The monthly weighted average Class I Butterfat Price is derived by multiplying the individual minimum Class I Price by the amounts of butterfat used to produce Class I Milk products in each Federal Milk Marketing Order each month in order to obtain the value of each Order's monthly Class I Butterfat. The aggregated combined monthly Class I Butterfat value is then divided by the total amount of Class I Butterfat pooled for the month in order to obtain the monthly weighted average Class I Butterfat Price for all combined Federal Milk Marketing Orders.

The year-to-date and annual weighted average Class I Butterfat Price for each and all Federal Milk Marketing Order(s) is derived by multiplying the individual monthly minimum Class I Butterfat Prices by the amounts of butterfat used to produce Class I Milk product in each Federal Milk Marketing Order for the year in order to obtain the value of each order's Class I Butterfat. The aggregated combined Class I Butterfat value is then divided by the total amount of Class I Butterfat pooled for the year in order to obtain the year-to-date and annual weighted average Class I Butterfat Price.

The Class I Skim Milk Price is the milk price announced each month for all Skim Milk used to produce Class I Fluid Milk products. The Class I Skim Milk Price for each Federal Milk Marketing Order is determined by adding the Class I differential for the particular county location of the regulated handler to the monthly Class I Mover (the nationwide Class I price before any Class I differentials are added).
