- Forms can be downloaded for free from LMPRS Industry website.
- Requires Windows 2000 or greater.
- You must be a local admin on your machine in order to install.
- The PKI Client accepts both ZIP and MPR file extensions.
- You must have a current Java Runtime Engine (JRE) installed on your machine. The JRE from Sun is free. Download at (<http://java.com/en/>)
- Can be run in Graphical User Interface mode (GUI) or batch mode. Most existing plants run this program on a scheduled bases with a batch job that is provided with the program.

Public Key Infrastructure (PKI) Certificate

- In order to successfully submit data to LMPRS, you must have a PKI Certificate.
- Certificates are \$19.99 per year.
- Certificates are issued to an individual.
- Certificates can be installed on multiple machines.
- LMPRS supports PKI certificate from Comodo (<https://www.comodo.com>)
 - Invalid, revoked, or expired certificates will not work.
 - Certificates that are exported to other machines must be installed using the correct password, otherwise LMPRS will reject the file submission.

How to name a file submitted to MPR

Example: ls89_ppppp_yyyymmddhhmmss.mpr

Where:

ls89 is the form number (i.e.- form LS-89 = ls89).

ppppp is the plant id.

yyymmdd is the current date.

hhmmss is the current 24-hour time notation in Central Standard Time.

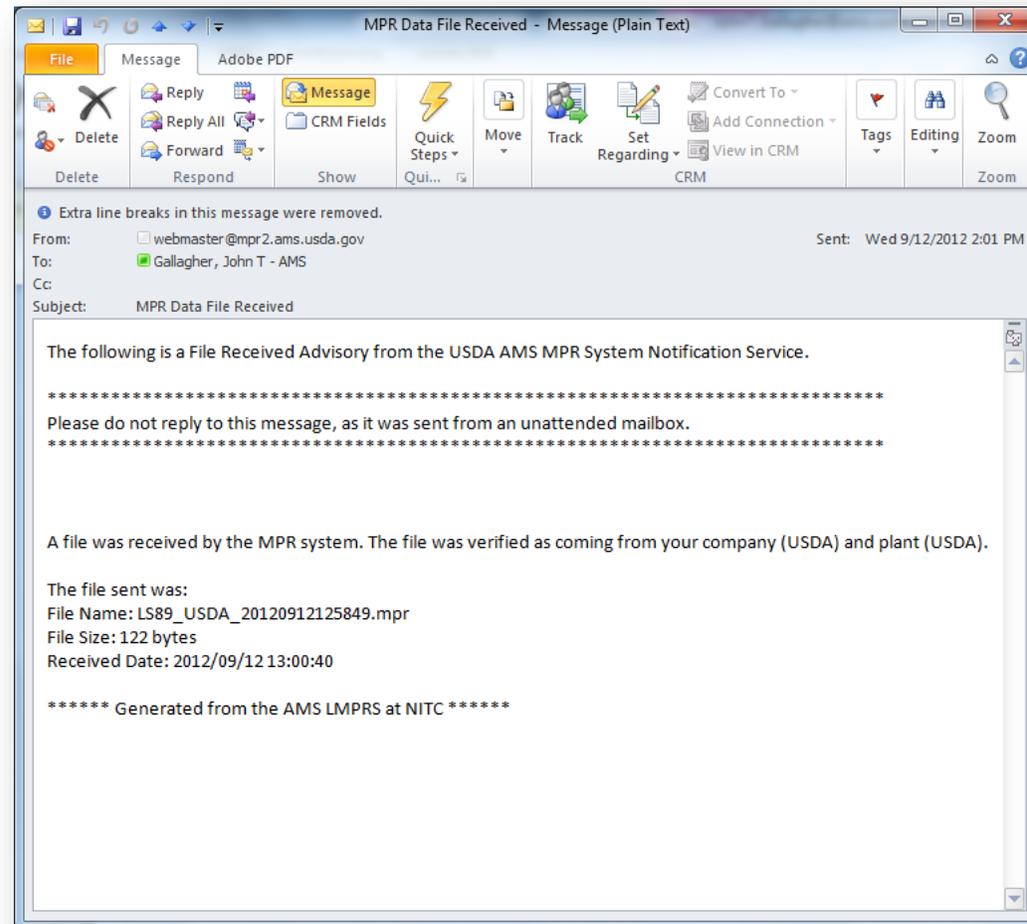

mpr is the file extension.

Valid filename = LS89_USDA_20120913094927.mpr

File Names MUST be unique. A file can **NOT** be uploaded to the USDA LMPR system multiple times.

Note: Form identifiers were recently updated to denote the new program name of Livestock, Poultry, and Seed (LS-XXX to LPS-XXX) and will be updated in LMPRS in the future.

- This is a typical email that a user will receive upon submission to LMPRS.

The Industry site also allows Plant users to update their account information and add or change information as they see fit.
